Flyboost is the new brand of high-tech falconry, created and developed by Italian falconer Giovanni Granati.

Flyboost is the result of several years of studies and researches in the field of falconry and birds' rehabilitation.

A pioneering study whose results have been published in the scientific journal Animals

WHY CHOOSE THE FLYBOOST SUPPLEMENT

To reach the bird's perfect psychophysical condition, the training must be supported by proper nutrition.

The Flyboost supplement has been specifically studied for this purpose.

It is the only supplement for raptors to have all the elements in compliance with the European regulations, the most restrictive worldwide.

Manufactured in Italy selecting one of the best manufacturers of animal supplements with a formula exclusively dedicated to birds of prey, studied and developed in collaboration with biologists and veterinarians.

A single supplement capable of supporting the raptor throughout the year, integrating all those elements that are needed especially for those who feed raptors with defrosted meat.
